
Laura W. Dijkhuizen

Currently living in Utrecht, the Netherlands

laura.w.dijkhuizen@pm.me
https://lauradijkhuizen.com

Passionate about plant biology and making complex science accessible. I bring a strong background in plant biology, bioinformatics, and team coordination. Skilled communicator thriving in autonomous, mission-driven teams.

Professional Attributes

- Clear **communicator** across technical & non-technical audiences
- Skilled **educator & mentor** to 500+ young professionals
- Experienced **chair** & consensus builder representing ∼2000 PhDs
- **Autonomous multitasker** with project leadership
- **Genomics data scientist** (R, Python, Bash/Linux)
- **HPC & workflow specialist**: Docker, GitHub, reproducible pipelines
- **Domain specialist** on plant symbiosis biology, genomics & environmental research

Employment & Education

2022 – now. **Lecturer & Trainer** in programming, bioinformatics & data science for PhD candidates & postdocs (GitHub)
Theoretical Biology & Bioinformatics Group at Utrecht University

2017 – 2022. **PhD Researcher and teacher** I secured funding for my own PhD on the (meta)genomics of novel crop *Azolla* (GitHub)
Molecular Plant Physiology Group, Utrecht University.

2010 – 2017. **MSc / BSc** Environmental Plant Biology
Utrecht University

Leadership & Project Management

2023 – now. Member, **Department Advisory Committee** , Biology Dept., Utrecht University. – feedback on strategic priorities & governance.

2021. Member, TU Delft **Research Assessment Committee** (Chemical Engineering & Biotechnology). – "Visitatie commissie" in Dutch (Report).

2020 – 2021. Member, **Faculty Open Science Implementation Team** & **UU Open Science Platform**. – driving reproducibility policies and innovations (Interview).

2019 – 2021. Member, **Curriculum Committee** , M.Sc. Bioinformatics& Biocomplexity. – Design a brand new Masters. (link)

2017 – 2021. **PhD Council Chair** and member **Board of Studies** (GS-LS) — representing ∼2000 PhDs. – negotiated new PhD graduation guidelines with three faculties.

2017 – 2021. **PhD Council Representative** , Institute of Environmental Biology.

Key Achievements

Trained 500+ PhD candidates & postdocs in my self made bioinformatics curriculum for professionals. (GitHub)

Skilled builder of reproducible pipelines like Nanopore variant calling (link) , pangenomics (link) , phylogeny (link) , and metagenome analysis (link). – Turning big data, into insight.

Chaired a council representing ∼2000 PhD candidates, leading organisational change for new graduation guidelines adopted by three faculties.

Experienced stakeholder manager and communicator serving on 5 more strategic committees (See Project Management section).

Experienced public speaker from elementary schools to scientific conferences and of course classroom (Outreach page).

Build and maintained a bioinformatics Linux server (link) enabling experimentalist colleagues to use my infrastructure with ease.

Worked with a wide variety of data. From PacBio long reads to microRNA-seq and from optical mapping to handwritten notes.

Teaching & Training

Lecturer & Trainer (2022–now): Design and deliver modular workshops in R, Python & Bash for PhD candidates and postdocs, tailoring content to individual research goals and team projects (GitHub).

Course Coordinator (2020–2021): Led the "Introduction to Bioinformatics" Master's course – integrating 8+ domain experts from across Utrecht Science Park into a unified, hands-on curriculum (GitHub).

Thesis Supervisor (2017–2022): Mentored 10+ MSc/BSc students on computational biology and plant physiology projects guiding experimental design, data pipelines, and results communication.

Workshop Facilitator & TA (2017–2020): Supported courses in Systems Biology, Plant Physiology, Molecular Genetics Techniques, and specialized bioinformatics bootcamps like Git.

Outreach & Communication

Television: Local TV interview on *Azolla* ferns (2017; Dutch) – Watch. And an interview for "De Kennis van Nu" popular science program (2018; Dutch) – Watch.

Radio: BNR national radio feature on Azolla (2017; Dutch) – Link

Print: Feature in AD newspaper (2018; Dutch) – Read

Lectures & Events: Frequent invited speaker and demonstrator at public science events, including gene editing seminars, hands-on plant biology demos, and outreach talks for schools (2018–2022).

Selected Scientific Publications

Genomics & Bioinformatics

- **Genome Engineering by RNA-Guided Transposition for *Anabaena* sp.** ACS Synthetic Biology (2024). DOI
- **Is there foul play in the leaf pocket?** New Phytologist (2018). DOI
- **Azolla ferns testify: seed plants and ferns share a common ancestor for LAR** New Phytologist (2021). DOI

Workflow & Reproducible Research

- **LAR phylogeny for Gungor et al. 2020: The complete analysis and dataset** Dataset (2020-07-24). DOI
- **Chapter 3: Hidden treasures: public sequencing data of symbiotic Azolla ferns harbours a genus-wide metagenome** Thesis chapter phd repo link

Plant Physiology & Ecology

- **The crane fly glycosylated triketide δ-lactone cornicinine elicits akinete differentiation of the cyanobiont in aquatic *Azolla* fern symbioses** Plant, Cell & Environment (2024). DOI
- **Control of the *Azolla* symbiosis sexual reproduction: ferns to shed light on the origin of floral regulation?** Preprint (2020). DOI

Interests & Volunteering

Volunteer Facilitator of monthly discussion groups and retreats for youth on gender fostering inclusive dialogue

Sports: Rock climbing, cycling & sailing

Event Organizer: "Bèta-dag" for 150+ high-school students and open science workshops

Advanced nature **photographer:** cover image featured on *Nature Plants* (Link)

PhD Thesis chapters

- **Chapter 1: A hitch-hiker's guide to Azolla symbiosis genomics**
  A broad, less formal introduction to Azolla symbiosis genomics, aimed at engaging a wider scientific audience and providing context for the thesis.
  Laura W. Dijkhuizen
- **Chapter 2: Foul play in the leaf pocket? The metagenome of floating fern Azolla reveals endophytes that do not fix N_2 but may denitrify**
  Discovery and analysis of prokaryotic DNA in Azolla, identification of associated bacterial genomes, and investigation of their metabolic pathways and ecological roles.
  Laura W. Dijkhuizen, et al. DOI
- **Chapter 3: Hidden treasures: public sequencing data of symbiotic Azolla ferns harbours a genus-wide metagenome**
  Development of a workflow to enrich and study genomes of bacteria associated with all sequenced Azolla species, revealing systematic presence and vertical transfer of key symbionts.
  Laura W. Dijkhuizen, et al.
- **Appendix B: Metagenomics practical**
  An educational practical designed to teach metagenomics principles and techniques to Life Sciences students, using Bash and Jupyter notebooks for hands-on learning.
  Laura W. Dijkhuizen GitHub
- **Chapter 4: Forever together: One Nostoc azollae is symbiont to all Azolla species**
  Comparative genomics of the main Azolla symbiont, N. azollae, showing near-identical genomes across hosts, high pseudogene content, and phylogenomic placement within Nostocales.
  Laura W. Dijkhuizen, et al.
- **Chapter 5: It takes two: Far-Red light induces the Azolla-Nostoc symbiosis sexual reproduction**
  Investigation of sexual reproduction and symbiont transmission in Azolla/N. azollae, including environmental triggers, gene regulation, and evolutionary implications for crop application.
  Laura W. Dijkhuizen, Tabatabaei, B.E.S., Brouwer, P., et al. DOI
- **Chapter 6: One, Two, Tree! A workflow for creating state-of-the-art phylogenies designed for reproducibility with JuPyter, conda and git**
  Description of a reproducible workflow for phylogenetic tree inference in land plants, using open-source tools and providing resources for semi-automatic tree annotation.
  Laura W. Dijkhuizen
